LQuiz 10

2022-02-24 (R)

Your name: _____

Exercise

(4 pt) Compute the following indefinite integrals (aka antiderivatives). Check your answers by differentiating. (What should you get?)

(a) (2 pt) $\int 3x^2 + 6x - 1 \, dx$

(b) (2 pt) $\int e^{2x} - \cos x \, dx$
